PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 4+ years across enterprise support, feature development, and production operations in supply chain, e-commerce, and CRM systems at CHS Inc. (Agri & Energy), Tapestry Inc., and Coach Inc. Beyond core platform work, independently designs and ships internal automation tools that are now part of daily operations — including a middleware service that cut a core data-processing workflow from 30-40 minutes to seconds, and a training/reporting ecosystem adopted across multiple teams. Comfortable owning a problem end-to-end: from identifying an operational bottleneck to designing, building, and deploying the fix. Core strengths in C#/.NET, ASP.NET Core, Angular, and SQL Server, with working exposure to CI/CD (Azure DevOps, Octopus Deploy) and production support tooling (Dynatrace, ServiceNow).

TECHNICAL SKILLS

- **Languages & Backend:** C#, .NET 6/7, .NET Framework, ASP.NET Core, ASP.NET MVC, Web API, RESTful services, Microservices concepts
- **Frontend:** Angular, TypeScript, JavaScript, jQuery, HTML5, CSS3, Bootstrap, Razor (.cshtml)
- **Data & ORM:** SQL Server, T-SQL, Stored Procedures, SSIS, SSMS, Entity Framework, EF Core, ADO.NET, MongoDB
- **Cloud & DevOps:** Azure App Service, Azure SQL, Azure OpenAI Service, Azure DevOps, TFS, Octopus Deploy, Git, GitHub Actions, Docker (basic)
- **Monitoring & ITSM:** Dynatrace, Application Insights, ServiceNow (Incidents, Changes, Problems)
- **Engineering Practices:** Unit Testing (xUnit/NUnit), API Testing (SOAP UI), Serilog, Retry & Idempotency Patterns, CI/CD Pipelines, Job Scheduling (Tidal)

PROFESSIONAL EXPERIENCE

Full-Stack .NET Developer | Wipro Limited — Client: CHS Inc. (Agri & Energy) | Bangalore / Kolkata / Remote Aug 2023 – Present
Support, maintain, and enhance a suite of enterprise web applications for a multi-million-dollar account spanning sales & purchase, transport, inventory, e-commerce, customer, and driver management. Independently identify operational bottlenecks and build automation tools to solve them. Stack: C#, .NET Framework/Core, ASP.NET MVC/Web API, Entity Framework, SQL Server, Angular, Azure DevOps, Octopus Deploy, Dynatrace, ServiceNow.

- Built a C# middleware service for the PlanetPress team that pulls files and data from the core JDE system, transforms them, and routes the resulting documents/emails to the downstream team — cutting turnaround from 30-40 minutes to a few seconds and removing manual effort for the entire team.
- Designed and built a daily reporting application where SPOCs across teams log data; it auto-triggers start-of-day, end-of-day, and reminder emails, stores data on a daily/monthly/quarterly/annual basis, and surfaces a charted dashboard for performance monitoring — replacing manual mail chasing and Excel logging across the account.
- Contributed to Shine, an automated training-portal application used across multiple Wipro accounts to onboard investment resources and new joiners, and to track records for production-access approval.
- Built an automated shift-roster creation and management application used by team leads and managers to keep scheduling accurate across the team.
- Developed a service inside an existing CRM application that reads user data from Excel, auto-generates orders, and sends scheduled confirmation emails — taking manual order creation off the team's plate.
- Act as the informal go-to developer for automation requests on the account — regularly identify repetitive manual processes, propose a tool, and ship it without dedicated project scope or a formal ask.

Full-Stack Developer (Junior) | Tapestry Inc. — E-commerce | Bangalore

Jan 2023 – Jul 2023

Worked within an established .NET Core e-commerce platform (admin portal + backend) alongside senior developers, adding features and enhancements to a live production system.

- Implemented feature additions and enhancements to order-flow, inventory-sync, fulfillment, and payment-integration modules; resolved bugs surfaced in checkout and order processing.

- Wrote and tuned SQL queries and stored procedures to resolve performance bottlenecks flagged by the support team.
- Paired with senior engineers on code reviews and production deployments, ramping onto an unfamiliar production codebase and contributing shippable fixes within the first weeks.
- Feature and bug-fix work reduced checkout reliability issues and brought down order-processing exceptions logged by support.
- **Tech stack:** C#, ASP.NET Core, SQL Server, Entity Framework, REST APIs, Git, HTML/CSS/JS.

Database & .NET Support Trainee (Junior) | Coach Inc. | Chennai / Bangalore Jul 2022 – Dec 2022

Supported a production SQL Server environment and .NET applications under the guidance of senior DBAs and developers.

- Assisted with database backups and index maintenance; tuned stored procedures flagged for performance issues.
- Monitored and troubleshoot ETL job runs scheduled via Tidal; diagnosed production timeout and access issues and coordinated fixes with the .NET development team.
- Worked directly with senior DBAs and developers to turn recurring incident tickets into durable, code-level fixes rather than one-off patches, reducing repeat timeout and access incidents.
- **Tech stack:** SQL Server, T-SQL, SSMS, Tidal Scheduler, C#/.NET.

Intern — Technology Training Program | Wipro Limited | Remote / Chennai May 2022 – Jul 2022

- Completed Wipro's structured technical training program covering C# and .NET fundamentals, OOP, SQL Server, and web development basics ahead of full-time onboarding.
- **PRP Score:** 85% — assessed on core programming, database, and application-development fundamentals.

PERSONAL / COLLEGE PROJECTS — DEPLOYED IN REAL TIME

- **nexus — Employee & Ticket Management Tool:** Full-stack application with authentication, RBAC, ticket lifecycle management, dashboards, and Excel export, built to mirror enterprise AMS workflows.
- **ASpynix — Company Portfolio Website:** Deployed static + dynamic portfolio site with CMS integration and a responsive frontend.
- **Additional deployed work:** An NGO platform (Pankh) with donation and volunteer-management modules; CMS-driven institutional portals with role management and reporting for multiple educational clients; and several local business websites for restaurants, shops, gyms, and vendors. EDUCATION

Bachelor of Science in Information Technology — Dr. Shyama Prasad Mukherjee University — 2022

CERTIFICATIONS

- Microsoft Certified: Deploy and Configure Azure OpenAI Service
- Microsoft Certified: Secure Azure Services and Workloads
- Microsoft Certified: Automate Azure Load Testing by Using GitHub Actions
- MongoDB Certified Developer Associate
- Foundational C# Certification
- Advanced ASP.NET Core Web API & Microservices
- Building Systems with the ChatGPT API

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
- **Availability:** 30 days notice period
